

Kim's Thousand Candles

Another year has almost gone

And relevance is hard to find

Recall the day that Christ was born

If you can clear your frantic mind

Reach out your hand to those around you this message is clear

Christmas is here and now no need to fear

What we believe will be a gift from heaven

And I believe we're meant for harmony

Just as a flame can light a thousand candles

A heart can set a million free

Now is the time to live in unity

You and me

Behold the star behold the tree

One perfect day, one perfect night

Reveal your flame for all to see

Our eyes work better in the light

Your fellowman is not your enemy

Forgive please don't fight

Our hearts can start anew and start it right

What we believe will be a gift from heaven

And I believe we're meant for harmony

Just as a flame can light a thousand candles

Our heart can set a million free

What we believe will be a gift from heaven

And I believe we're meant for harmony

Just as a flame can light a thousand candles

A heart can set a million free

Now is the time to live in unity

You and me

You and me
